PAULA PUENTES

INDUSTRIAL ENGINEER

PERSONAL PROFILE

I am a dedicated and proactive industrial engineer, eager to improve my multiple skills and grow professionally. Not only am I a hardworking and responsible person, but also I perform tasks in a timely and efficient manner. I work well independently as well as in a team. I am a reliable and calm employee who always promotes dialogue and loves learning every day.

DETAILS

Date of birth: 26-08-1994
Place of birth: Buenos Aires, Argentina
Nationality: Argentina-Italiana

PROFESSIONAL RESUME

Full Stack Developer

EXXONMOBIL | NOVEMBER 2022 - PRESENT

My main tasks are to migrate Unity, which provides a set of ready-to-use UI components and page templates for ExxonMobil web applications, from PHP to the open source Storybook library. (Using React.js)
I have actively contributed to the design community, specializing in the development of dynamic web pages utilizing the Vue.js framework. Each project presents unique challenges due to varying requirements. Notable tasks include the implementation of features such as search bars, pagination systems, and other complex functionalities.

Productivity Solutions Analyst

EXXONMOBIL | MAY 2022 - NOVEMBER 2022

My daily activities consist of establishing relationships with clients to understand how they do their work today and based on that, develop technological tools for them. As a Sharepoint developer, I seek automation and the elimination of paper-based processes, ensuring that the jobs are more efficient and productive. Furthermore, another daily task in my working day is the development of web pages and other front-end activities using HTML, CSS, JavaScript and the Vue.js framework.

Functional Analyst

GLOBANT | FEBRUARY 2018 - MAY 2021

I am responsible for making data disclosures, analyzing them and designing computer systems.
My daily tasks include not only interpreting customer problems and needs, but also satisfying their requirements in purchasing, inventory and sales processes, using ERP systems and data analysis programs.
What is more, other activities that I carry out are based on finding the root cause of the system failure, solving it and finally, carrying out tests to guarantee its correct functioning, always respecting the delivery deadlines.

ACADEMIC STUDIES

Universidad Católica Argentina
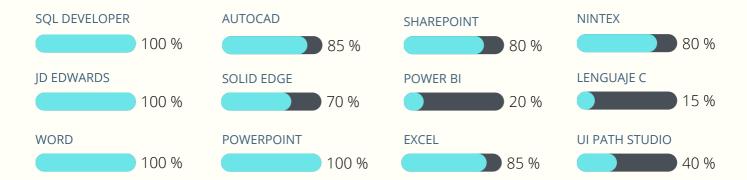

INDUSTRIAL ENGINEERING

- Status: Completed. March 2013 - February 2019
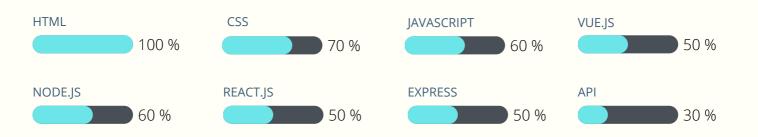

Università degli studi di Parma

IINDUSTRIAL ENGINEERING (1 YEAR EXCHANGE)

- In 2017 I did an exchange to continue my university studies abroad. The place chosen was Italy at the Università degli studi di Parma. This experience was really enriching because I had not only the opportunity to continue with my subjects, but also to be in contact with people from different cultures, who gave me a lot of learning and teachings.
